

**INSTRUCTIONS FOR ASSEMBLY OF
PEDESTAL TYPE**

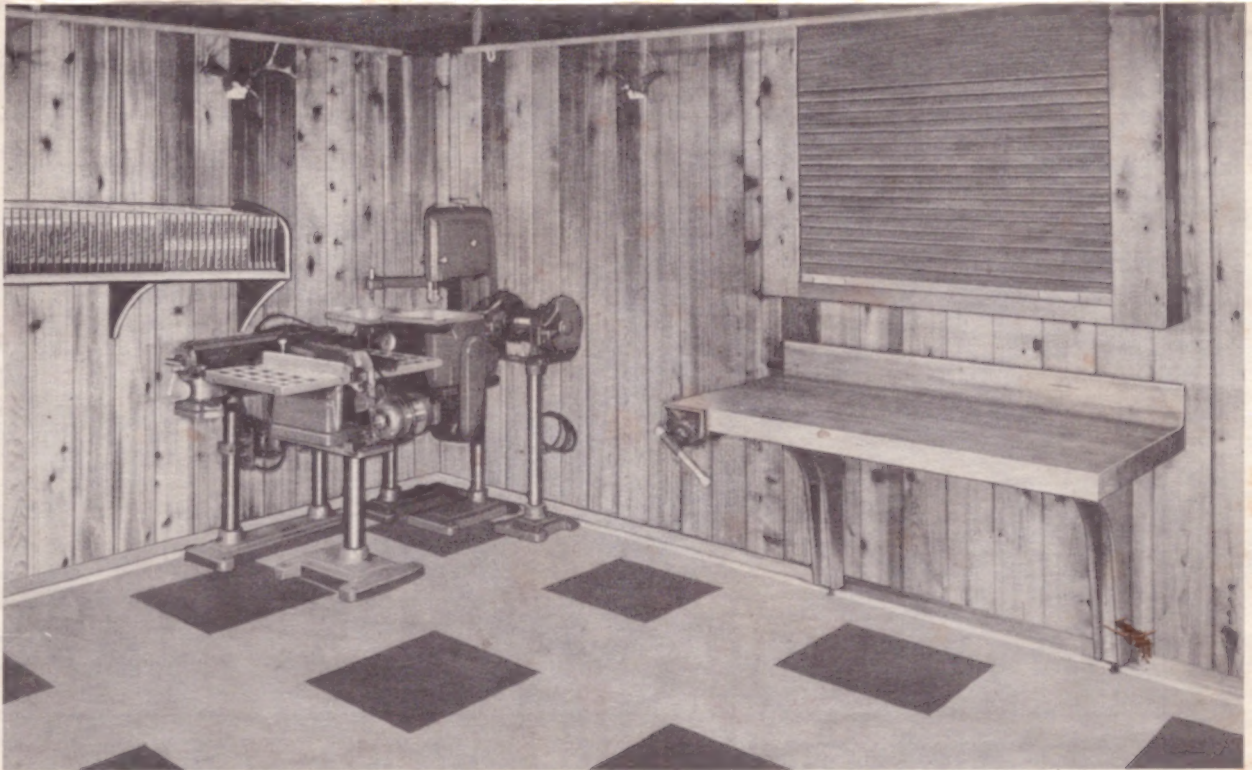

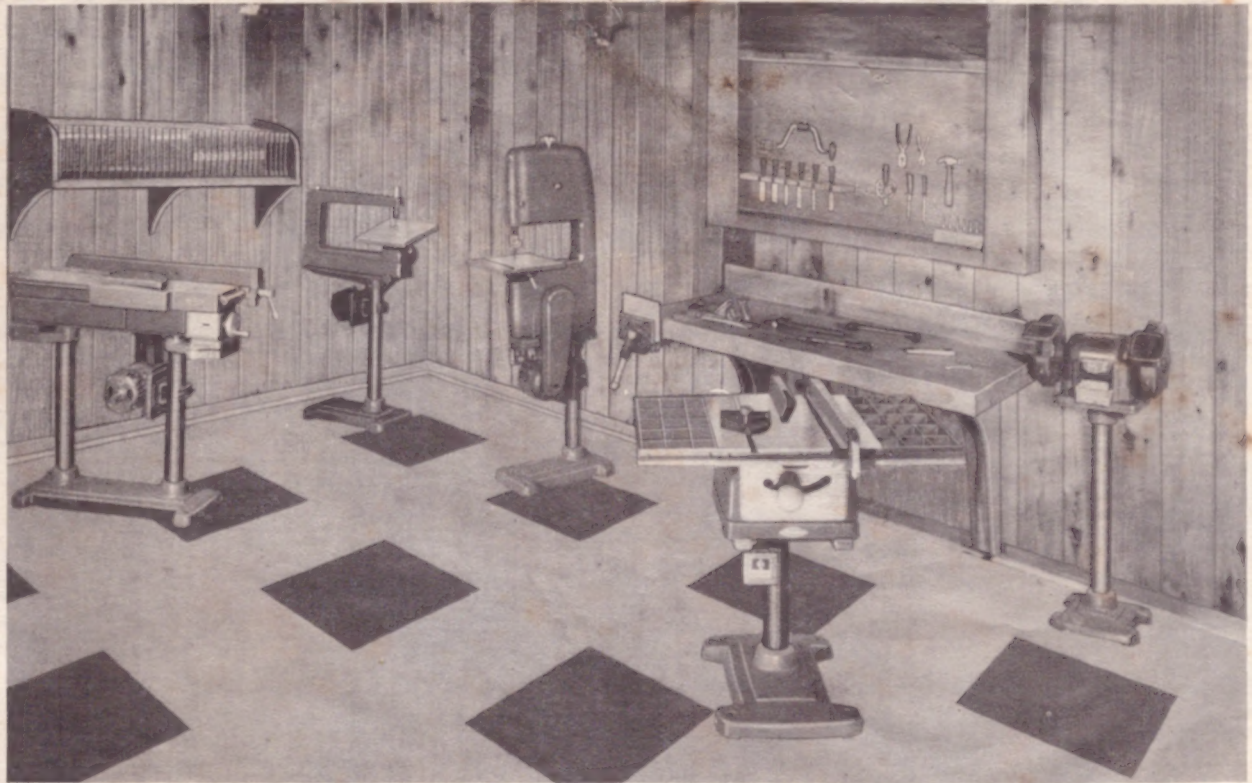

**CRAFTSMAN
TOOL STAND 99-2228**

FOR BENCH SAWS 99-2104, 99-2999
99-2000

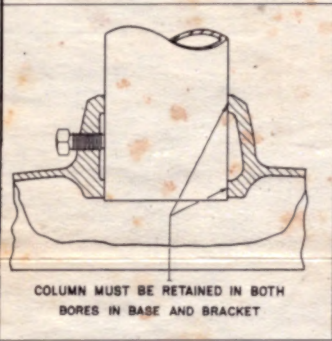

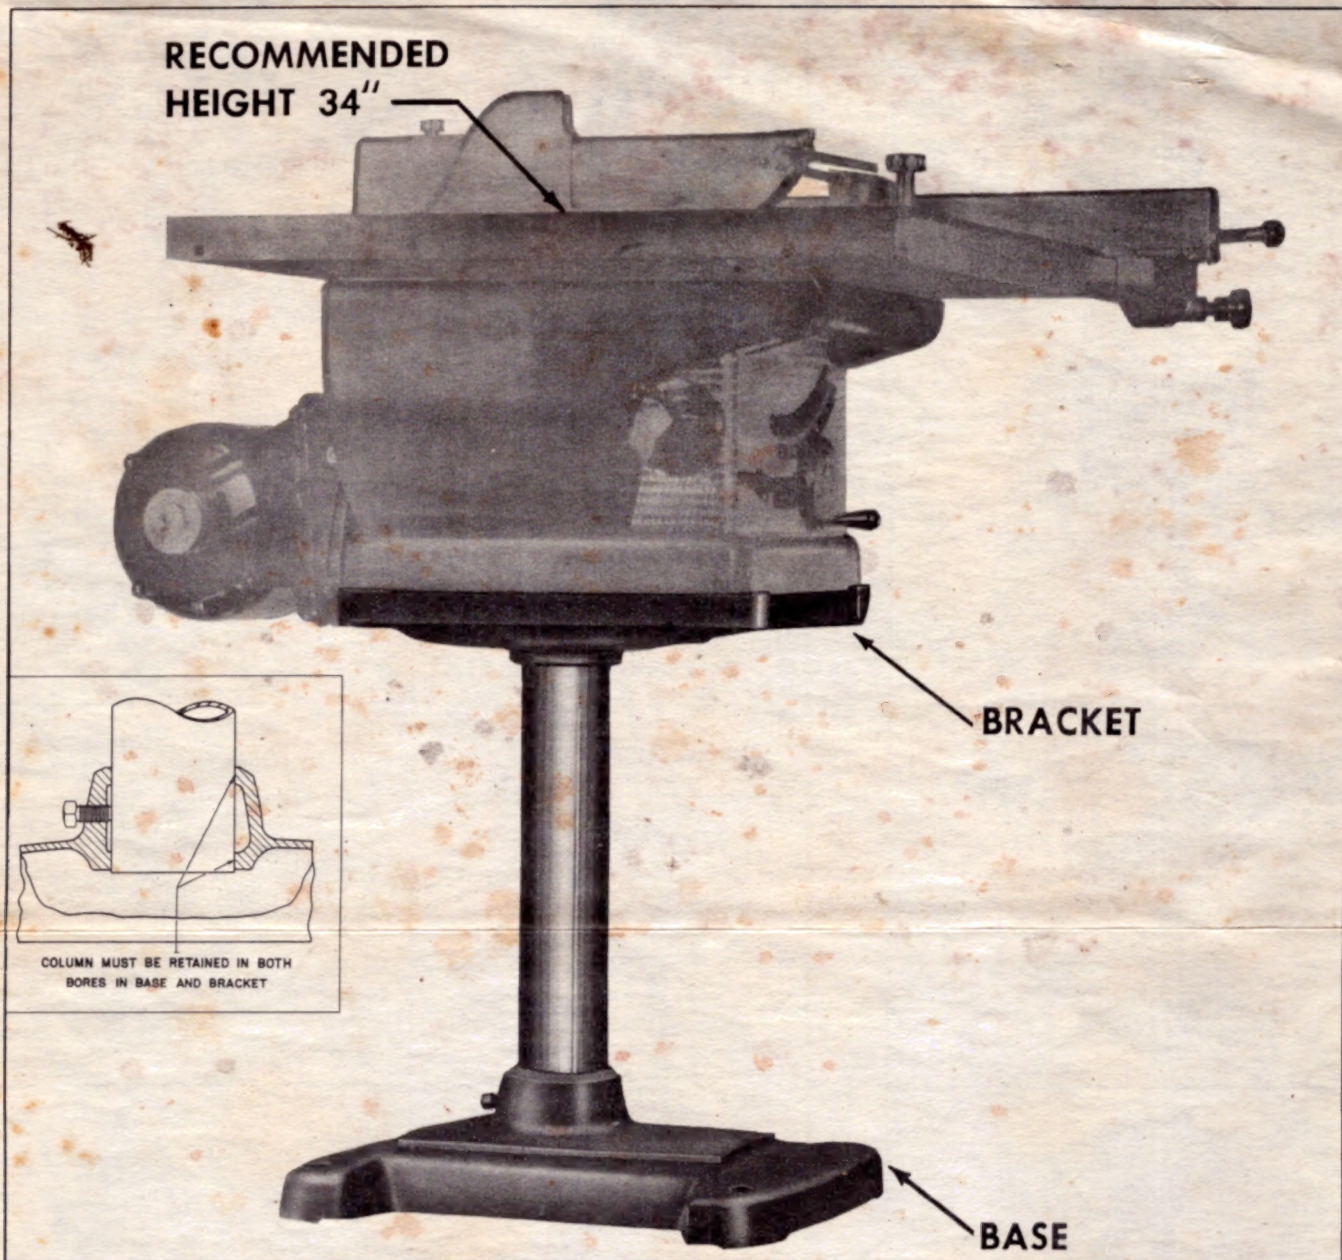

**SEARS, ROEBUCK and CO.—U.S.A.
SIMPSONS—SEARS LIMITED—CANADA**

LITHOGRAPHED IN U. S. A.

Through the use of Casters, which may be purchased under Cat. No. 2819, you can better utilize your Workshop Area.

ASSEMBLY INSTRUCTIONS

Assemble the column into the base casting and tighten the square head set screw securely. Place the tool support bracket in position and secure with the set screw. Position your saw on the bracket with the front of the saw base against the two projections on the front of the bracket. Fasten the saw to the bracket with the four 5/16-18 x 1½ inch square head bolts, and the nuts and washers provided.

A spacer and carriage bolt has been included which will permit mounting a Powr-Panl, Cat. No. 21205, if so desired.

The illustrations show a suggested position at one of the forward tool mounting holes. Mount the switch to best suit your needs.

After removing one of the mounting bolts, attach the switch with the long carriage bolt using the spacer between the Powr-Panl bracket and the tool mounting bracket to provide adequate accessibility for motor cord plug.

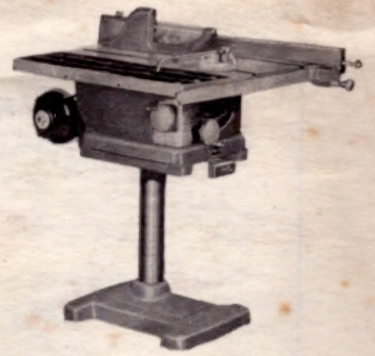

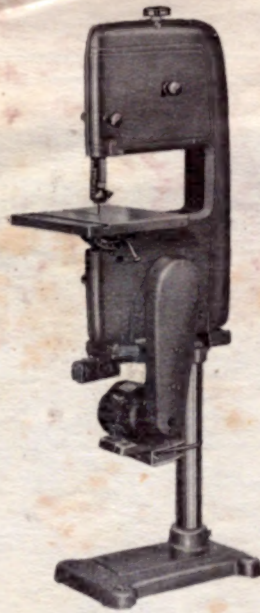

A cap, which is supplied, can be placed in top of column, to prevent sawdust from entering.

AVAILABLE ACCESSORIES

PURCHASE FROM YOUR NEAREST SEARS RETAIL STORE OR MAIL ORDER HOUSE.

FOR READY MOBILITY USE SET OF 4 CASTERS — CAT. NO. 2819
